Subject: Two Additional Cement Creek/Animas River Reports

Steve:

I had to put the two reports that we looked at out on the I drive (here is the complete path to the files/folder) - **I:\30 Day Share\Wharton - Upper Animas River**. Please know that SEMS Document ID (08-380091) is the short one and had both Pat Smith's and Rick Brown's signature. It has a "Prepared by Camille Farrell Price" date of March 1999. The seconded document with SEMS ID (08-380086) is much longer, 534 pages, and has a title page with "Prepared by Camille Farrell" date of April 1998.

In the mean time I will continue to see if I can find the URS Validation Report.
